ZEESHAN AHMAD

Full Stack Developer (MERN)

03045759756 • za5743759@gmail.com • github.com/zeeshan-ahmad-dev

PROFILE

Full stack developer who built and deployed **SoloLevelX**, a gamified fitness app serving **750+ users with ~25 daily actives**, grown entirely through organic channels. Experienced with authentication flows, payment integrations (Stripe webhooks), database design, and production deployment. Currently seeking an on-site internship to apply my skills in real-world development environments and continue growing as a developer.

PROJECTS

SoloLevelX – Full Stack Fitness App | 700+ Users

- Built full-stack gamified fitness platform using MEVN stack (MySQL, Express, Vue, Node, Tailwind CSS)
- Serves 700+ registered users with ~25 daily active users, grown entirely through organic channels
- Implemented authentication, quest tracking with midnight cron jobs, HP penalty system, leaderboard, and in-app shop
- Designed responsive UI/UX in Figma

→ Live: *sololevelx.vercel.app*

Bookora – MERN Stack E-commerce Platform

- Developed bookstore platform with Google OAuth and Stripe payment integration (including webhook verification)
- Secured sessions via cookies and implemented route-level auth protection to prevent unauthorized access

Instagram Clone – MEVN Stack Social Platform

- Built social platform with posts, likes, comments, and Facebook OAuth login
- Designed REST API backend handling relational data across multiple MongoDB collections

TECHNICAL SKILLS

Frontend: HTML, CSS, JavaScript, Vue.js, React.js, Tailwind CSS, jQuery

Backend: Node.js, Express.js

Databases: MySQL, MongoDB

Tools: Git/GitHub

EDUCATION
